* Take Arisa as an example

1. Normally, the model has been assembled, but if there is a problem with the material of the model after importing, please follow the steps below:

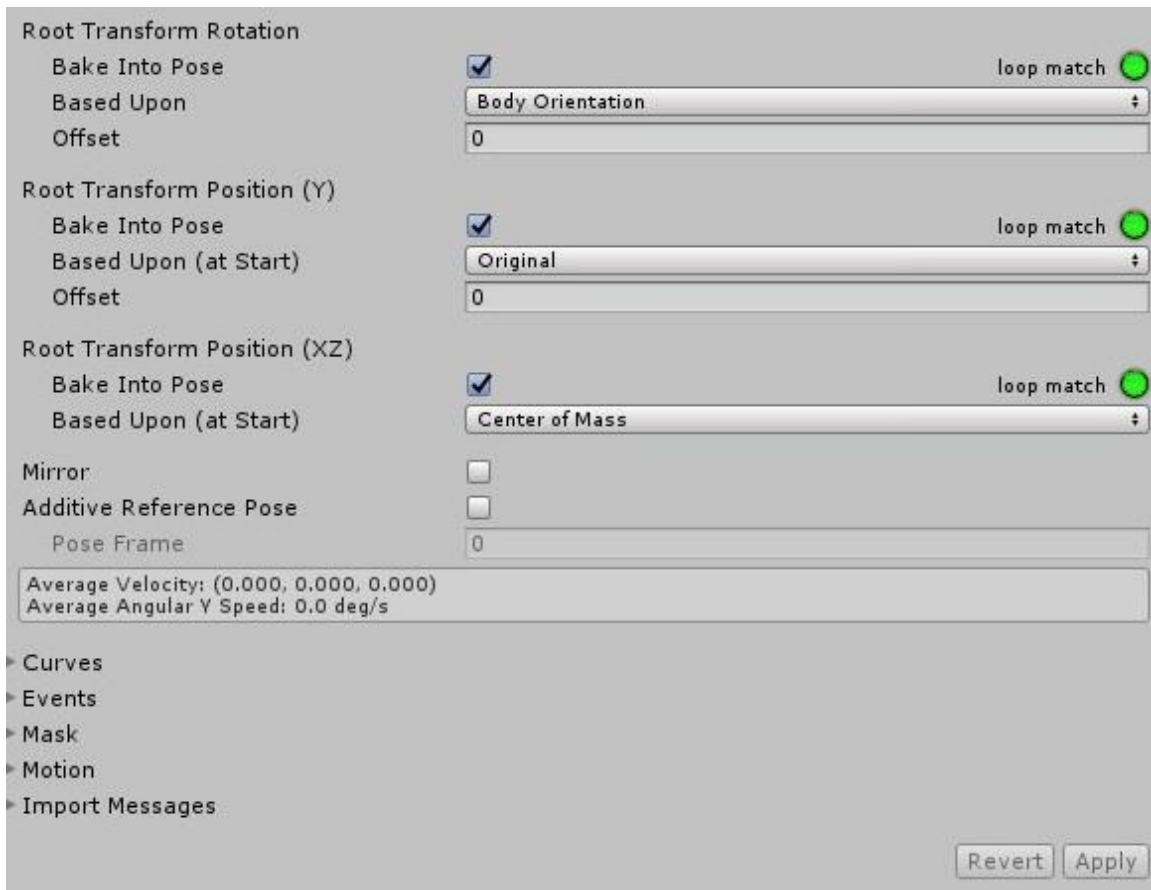

* Drag the materials to the field, then click Apply

2. Set Animation. If you need to press and hold keyboard like Idle, Walk, please check these five options:

3.If you only need to click the keyboard like Jump or Attack, please check these three options:

4. To download more Animation, please search for "Mixamo" on Google, enter the official website and register for an account

5. After logging into your Mixamo account, click on "Upload Character" on the right, then drag our Arisa.fbx file into it, then please give Mixamo some time to load the model

6. Then select the Animation you want, then press Download

DOWNLOAD SETTINGS

Format FBX for Unity(.fbx) ▼	Skin With Skin ▼
Frames per Second 30 ▼	Keyframe Reduction none ▼

CANCEL **DOWNLOAD**

7. Move your downloaded Animation file from the download folder to the Asset folder

8. Then start to repeat the above steps No1, No2, No3 (Material / Animation Option)

9. For example, we just downloaded "Arisa @ Standing Greeting" from Mixamo and dragged this file to the Asset folder. Then we select it in Unity and then go to Rig change to (Humanoid / Copy From Other Avatar). Drag ArisaAvatar to Source and press Apply to finish
